

Name:

Date:

Look at six different kinds of soft drink. Find out how many grams of sugar each has per 100ml. Complete the table below. An example has been done for you.

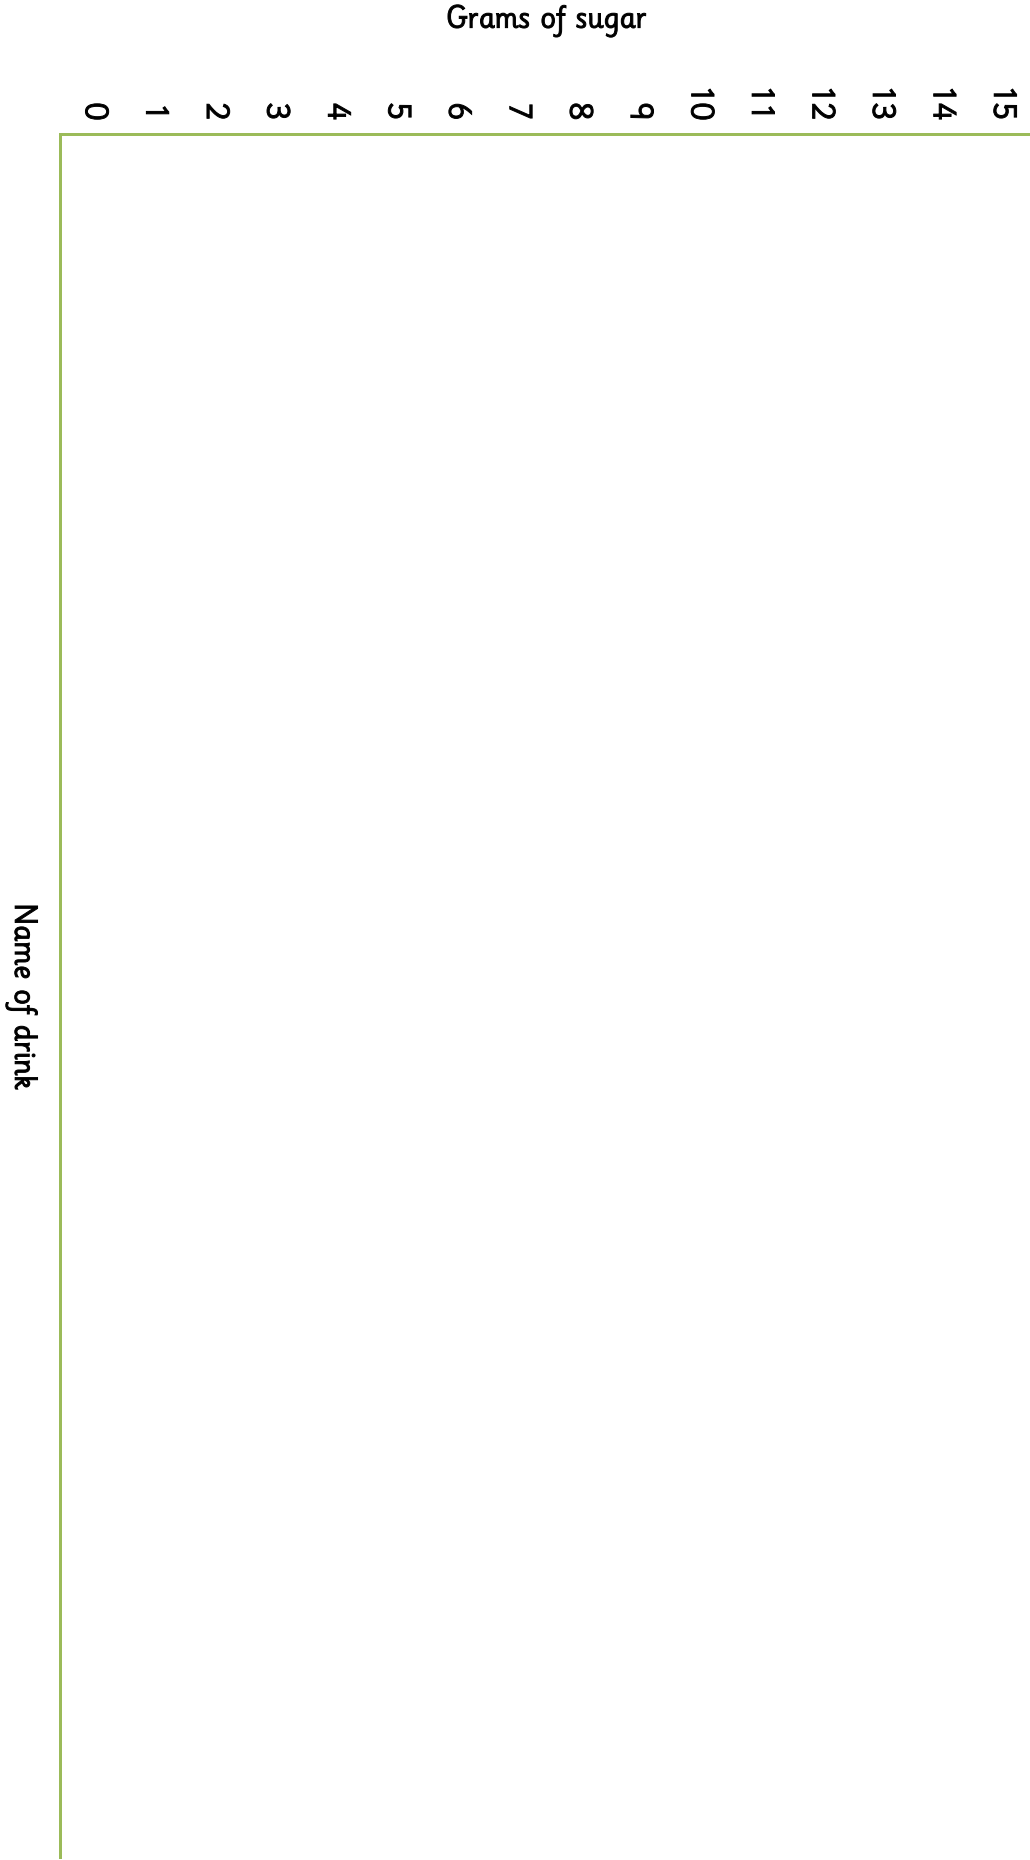

Name of drink	Grams of sugar per 100ml	Grams of sugar rounded to nearest whole number
Coca Cola	10.6	11

How much sugar? A data handling activity

Now use the axis below to create a graph to show your data.

Title:

Teacher's notes

This activity links well to the theme of healthy eating. Children can bring in soft drinks from home to investigate their labels, find out more about their chosen drink on the internet or use the Change4life Food Scanner app.

Ask children to input their data into the table, round each number to the nearest whole number and then present it on the graph.

If you have time, you may choose to use Excel to create a pie chart to show your collected data.
