## 8 words and meanings to learn

| Key Word | Meaning                                             |
|----------|-----------------------------------------------------|
| arm      | The part of your body attached to your shoulder.    |
| leg      | The part of your body that you use to walk.         |
| nose     | The part of your body used to smell things.         |
| hand     | Your hands can be found on the end of your arms.    |
| foot     | Your feet can be found on the end of your legs.     |
| ear      | The part of your body used to hear things.          |
| eye      | The part of your body used to see things.           |
| mouth    | The part of your body used to eat and taste things. |

## Working Scientifically

## In this unit I will:

- ☐ Learn about different parts of the body
- ☐ Learn how our bodies change from babies
- ☐ Learn how we all have similarities and differences
- ☐ Learn we are all unique
