

Animals including humans 2 – Life Cycles

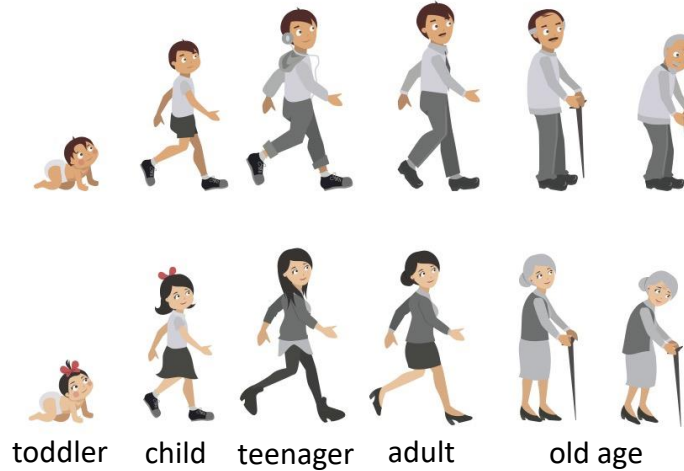

Working Scientifically Skills

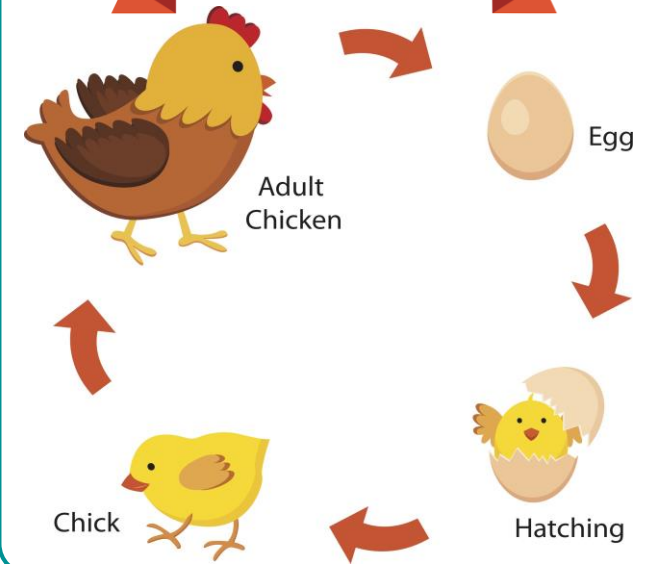

Careers connected to the life cycles of animals including humans:
doctor, nurse, vet, zookeeper, biologist

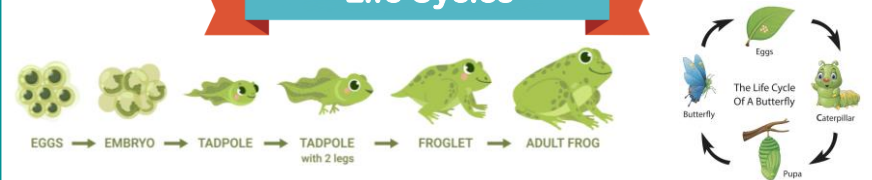

Human Life Cycle

Chicken Life Cycle

Life Cycles

In this unit we will...

- Learn that animals including humans have offspring that can grow into adults.
- Observe and record the stages of life cycles of animals including humans.
- Use scientific enquiry and observations to classify and identify animals and their offspring.

life cycle	a diagram showing the changes in the life of a living thing
foetus	a baby growing inside its mother's womb
womb	area of the mother's body where the foetus grows
offspring	the child, or young, of an animal or plant
reproduction	the process of producing offspring
transformation	a change in appearance or form
metamorphosis	the processes of insects, and some animals, developing into adult forms through a cycle of change
froglet	a young frog that has recently changed from being a tadpole
