people who
need this
stuff but
need it
eco-friendly.

Flame!
it gives Heat,
Light and Scent

Eco friendly
Candle

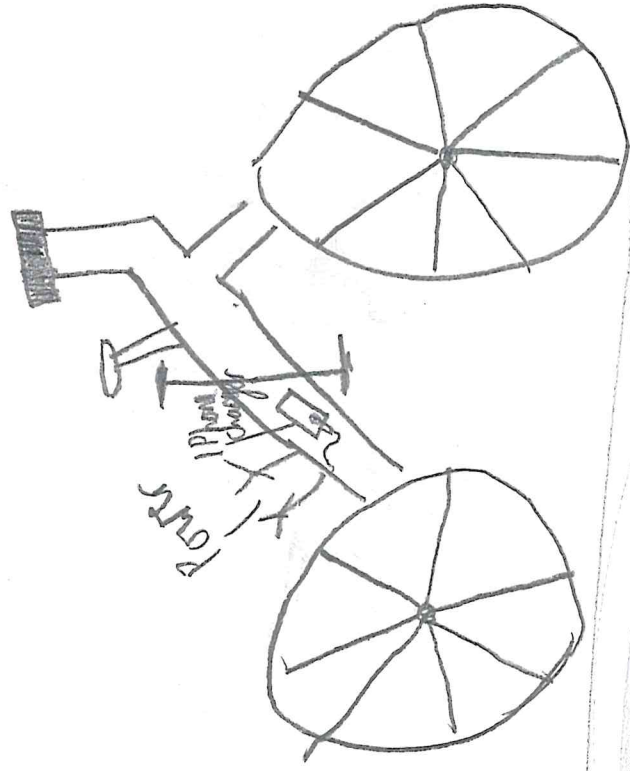

choose
whatever
scent
want you

Automatic
Candle
It creates
wonders

ELECTRIC BIKE

7 we always cured as younger or older people who aren't quite as strong but want an exercise and an easy way to travel at the same time. This bike boosts pedals and makes the electricity through solar power and windpower to make electricity by using it. You also can use the rest of the energy to charge your phone

CLEANER

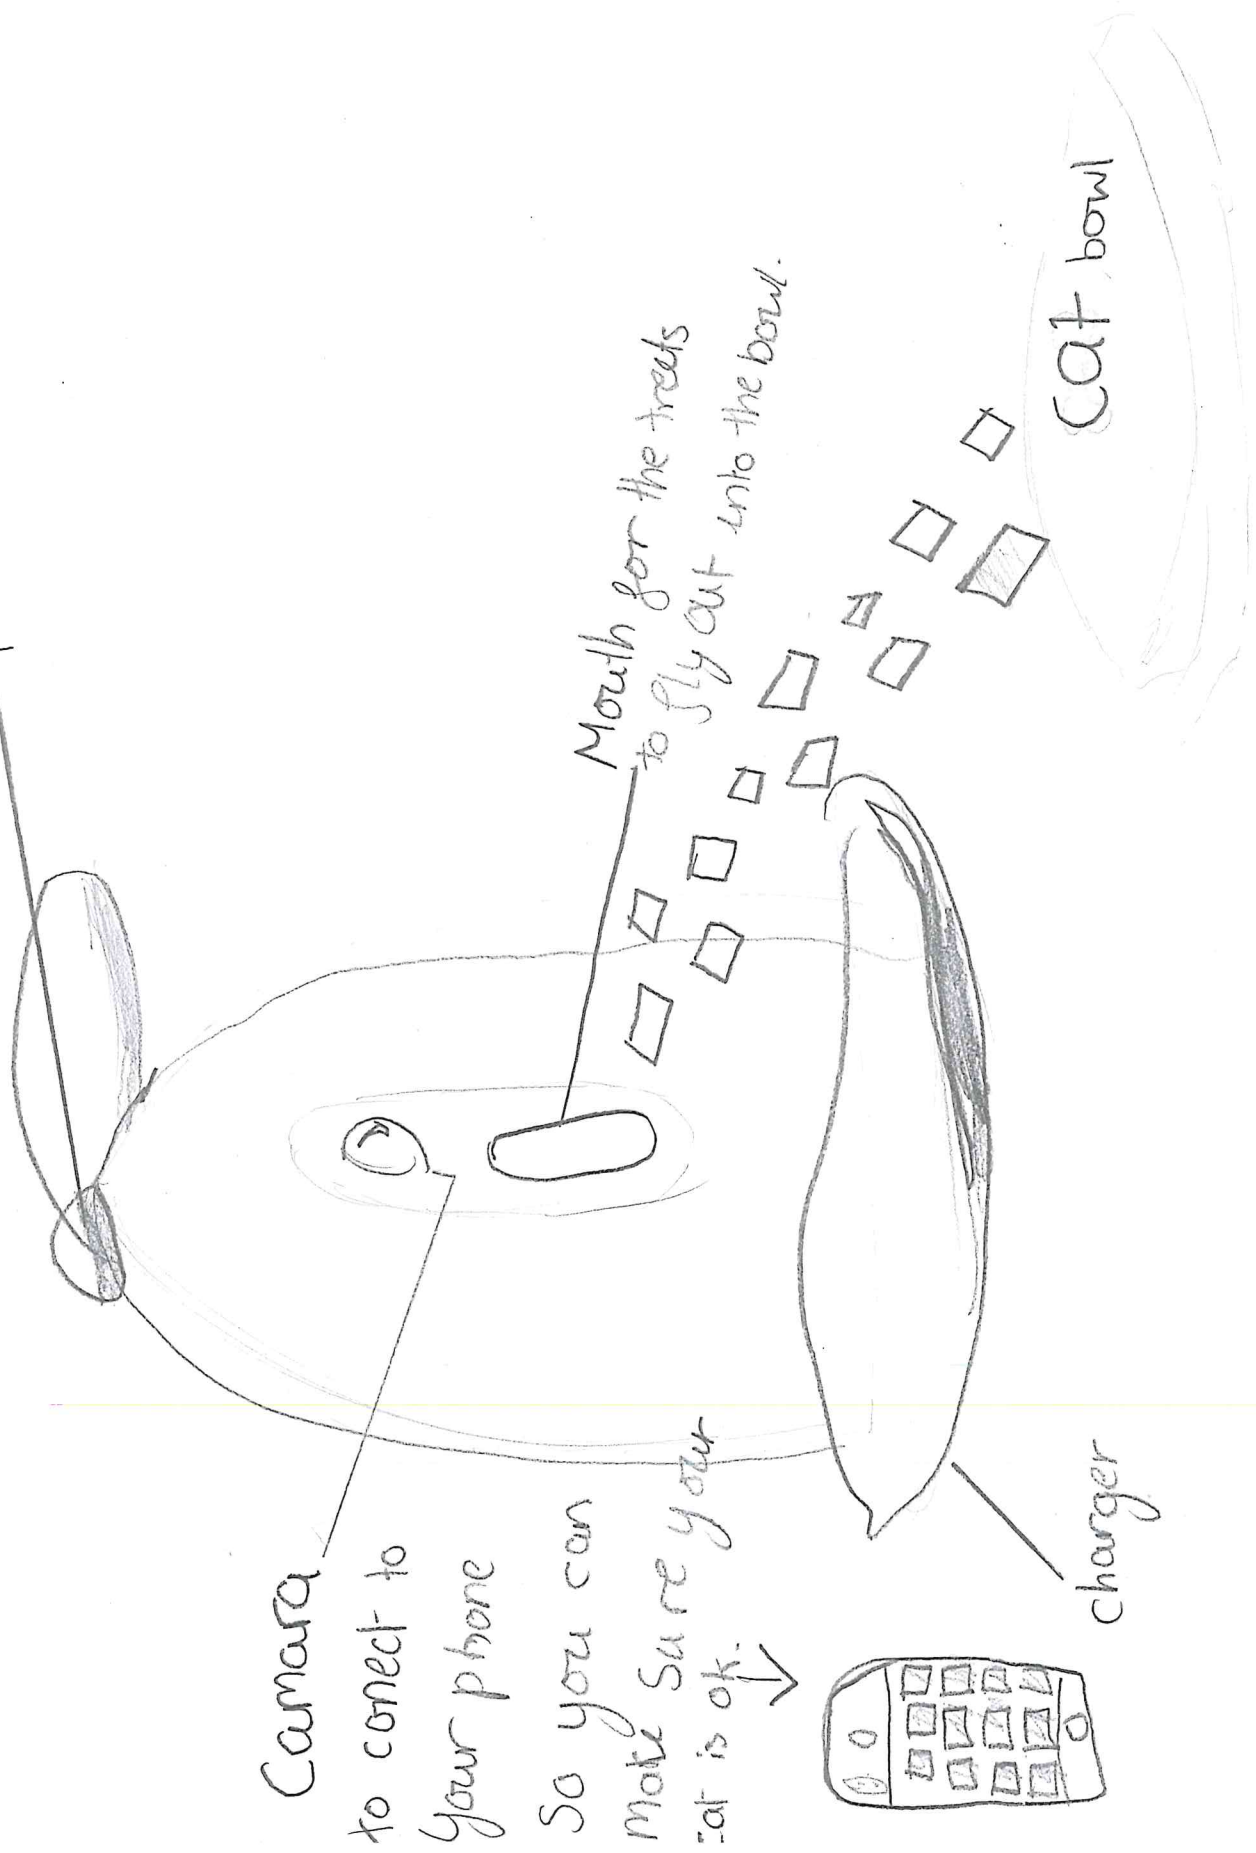

The cleaner does all the washing and it even cleans the floor for other people all you have to do is press the button.

The cleaner is for my granddad so it can do the floor for him and does the dishes for him and it is for my family as well and people who needs things to be cleaned.

CAT Feeder

Maddie

put the treats ~~in~~ In

Camera

to conect to
your phone

So you can
make sure your
cat is ok. →

charger

cat bowl

Mouth for the treats
to fly out into the bowl.

AUTOMATIC DOG DISPENSER

AUTOMATIC DISPENSING

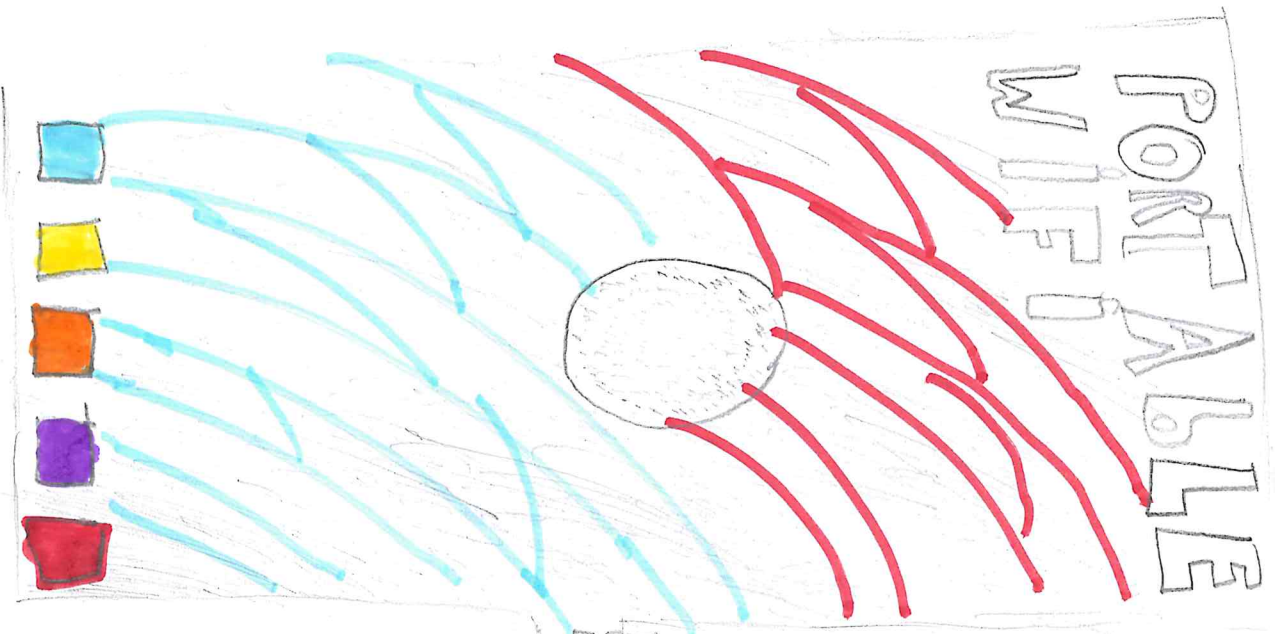

The perfect Product for dogs is the automatic feeding dispenser for dogs. You may wonder what what this model does, well if your away or at work and leave your dog home this model will be able to feed your dog the certain amount it needs at the time you choose. It does not just feed them, however, but also water them and occasionally feed them treats. We highly recomend this model to those dogs who misbehave while eating.

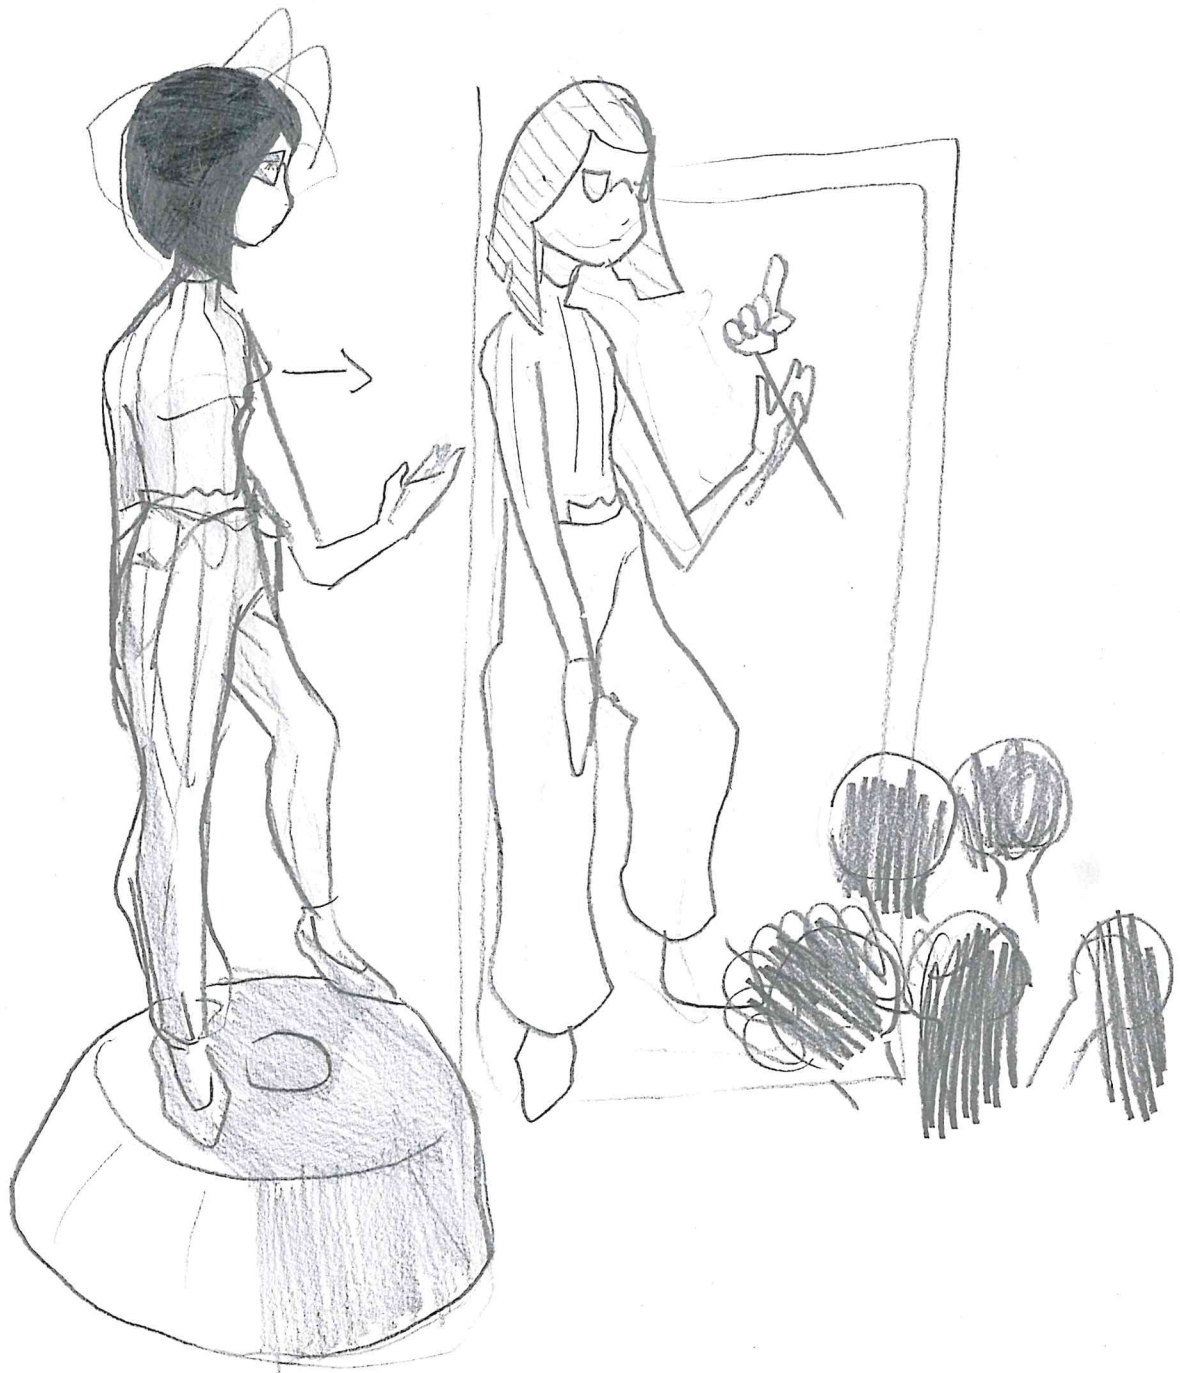

PORTABLE WIFI

Portable wifi would be good when you're travelling and you can't use the internet for example if you're going on a bus for a long time. It would be a little rectangle when you plug it in to a device.

It would be good for people who travel a lot because maybe if they were on a plane going on holiday and they use their device all the time, they might not have wifi.

In the early stages of transportation, this invention will be perfect. If running late of a surgeon takes place yet your children need to learn, you / your kids can stand / sit, ect. on the Hollow (Device you see above) and you will instantly be turned to a hologram and be teleported to said place.

My AI system

It is a robot mob that is for a Janitor. It spins around when you operate it to clean all of the dust in a circle plus it has 4 robotic legs so you turn it on and all you do is to code it to walk around and clean! It will sadly be 1M European pounds though so save up! Plus its hair on top cleans the toilet! Plus again its arms are dog poo bags and pick up poo. Plus with gilled poo bags they retract back into tennis rackets for sporty people.
